“Rethinking Education for Sustainable Development: A Key to Our Future”
17th to 21st September 2018
Livingstone, Zambia

36th EEASA Conference Excursions

For many years, Livingstone town was the Railway Capital of a vast region and much of its wealth came from the railways. The railway museum covers history from the days when the bridge crossed the gorge to the building of the great TanZam railway in the late 1970s and is dedicated to preserving Zambia's railway heritage, the museum also has exhibitions on the history of the Jewish race in Zambia.

RAILWAY MUSEUM

Situated along the upper Zambezi River, Mosi-Oa-Tunya national park includes the Victoria Falls and stretches for about 12 kilometers up the Zambezi River above the fall. The park has healthy populations of zebra, buffalo, giraffe, warthog, monkeys, birds and impala, as well as the occasional elephant that wanders across from Zimbabwe. With no big cats the major highlight is the endangered rhino.

MOSI-OA-TUNYA NATIONAL PARK

THE MIGHTY VICTORIA FALLS

The mighty Victoria Falls presents a spectacular sight of awe-inspiring beauty and grandeur on the Zambezi River, forming the border between Zambia and Zimbabwe. It was described by the Kololo tribe living in the area in the 1800's as 'Mosi-oa-Tunya' – 'The Smoke that Thunders'. In more modern terms Victoria Falls is known as the greatest curtain of falling water in the world and is Livingstone's greatest treasure.

LIVINGSTONE MUSEUM

Livingstone's famous museum is the oldest museum in Zambia established in 1934 as the David Livingstone Memorial Museum. The museum has exhibits of artifacts related to local history and prehistory, including photographs, musical instruments, and possessions of David Livingstone, the explorer and missionary. It is recommended for groups interested in history and the preservation of culture.

ENVIRONMENTAL PROJECTS WITHIN LIVINGSTONE

African Impact's Eco-Building project in Livingstone (a stone's throw from the magnificent Victoria Falls) is a world-first and has won multiple awards for innovation and excellence. By using plastic bottles and discarded rubbish to create bricks, you are able to build vital structures while cleaning and beautifying the community. This project seeks to help reduce waste and the impact of plastic in the tourist town of Livingstone by creating innovative eco-bricks.

LIVINGSTONE REPTILE PARK

Kazungula Bridge and Border Project (KBBP) is a road and rail bridge under construction over the Zambezi River at Kazungula by governments of Botswana, Zambia and Zimbabwe.

Construction of the bridge to replace the existing ferry was commissioned in August 2007 by Zambia and Botswana.

The project comprises the construction of road/rail bridge with a span of 932 meters over the Zambezi river and border facilities in each country and approximately 10 km of bridge approach and access roads. The USD259.3 million project, which includes international border facilities in Zambia and Botswana is due to be completed by 2019.
